

Data Logger to PC Interface

PC-IC Interface Cable

PC-IC Interface Cable

The PC-IC Interface Cable allows fast and easy communications between a Veriteq data logger and your computer.

This cable is supplied as an integral part of the Spectrum Software package (PC-SFW-IC) or it can be ordered separately to set up additional data logger workstations.

The PC-IC Interface cable is 5 feet (3m) in length, allowing you to comfortably connect it to the serial port on the back of your PC.

How to connect your data logger to a PC:

Attach this end of the PC-IC cable to the serial port on the back of your PC

Plug the other end into your data logger
